Subject: List of deliverables -settlement communication not for distribution confidential privileged attorney client information

Here's the proposed list of deliverables:

1. Basis of Design Report, specifically noting this includes several component technical memoranda which include:
 - Collection system flows and loads (basis of tank sizing and performance)
 - Site Contamination and Characterization (what is underground that has to be remediated)
 - Site Remediation Alternatives and Technologies (how will we remediate the contamination)
 - Geotechnical Investigations and Design (to support basis of design for SOE)
2. Remedial design activities that will coincide with facility planning, including:
 - Remedial design workplan
 - Remedial action workplan
3. The 30%, 60%, 90%, and final design packages, which would include:
 - Design submittals for the tank infrastructure
 - Support of Excavation detailed design, and
 - Remediation related activities for soil and groundwater handling

4. CEQR/ULURP documents.
